

7b. Elective Rotations:

Elective Rotations

Instructions

In your narrative, please include for each rotation/module:

- Educational goals and objectives
- Curriculum structure; how the structure of the experience (module or longitudinal experience) will meet the mandated requirements (Appendix 2. I - IV)
- Describe the clinical experience
- Describe the formal and informal interactive learning techniques (e.g., problem-based learning, clinical case presentations, journal club) which will be used to provide cognitive and technical experience (Appendix 2. VI)

Information can be entered in the text boxes or incorporated into a separate uploaded file describing the rotation(s). Duration answers should indicate the net duration for specific blocks or if the experience is longitudinally incorporated into other blocks estimate the amount of time which represents the experience. For example, if pediatrics or neuroradiology cases arise during neuroanesthesia rotations, estimate the amount of time (as fractions of a month) which best represents the experience.

Other Elective Rotations

If there are more than 3 elective rotations, please upload a file describing them to include for each:

- Elective Title
- Duration
- Narrative

Other Electives Upload

Report the experiences in elective modules that will contribute toward completing required goals.
